Stainless Steel Dry Wet Feeder Advantage

1. People gradually realize that good feeder can save a lot of food for pig farms. In addition, a good feeder can also save water, cleaner, more durable.
2. Some of old design feeder may store food in the corner. It is easily moldy, therefore it would cause health problems of pigs. Our mission is to solve this problem, and avoid unnecessary losses to the farmers.
3. We must use the feeder 304 stainless steel material as the basic material, ensure the whole life will not appear quality problem.
4. Food adjustment device design is reasonable, easy to operate, both ends of the material evenly, adjust the height can be freewill selected.
5. Standard parts especially the washer as fastener parts are made of stainless steel, no rust, beautiful appearance.

6.Touch-type drinker when the pig's mouth touch the bottom steel column, the water will flow out and the pigs can drink.
